Project Title:

SmartCart – An Online Shopping Cart Platform

Objective:

To design and develop a user-friendly, responsive, and secure website that allows customers to buy products, add them to a shopping cart, and complete purchases online with ease.

Scope:

- Allow users to view and buy products.
- Let users add items they want to buy into a cart.
- Enable users to place orders and make payments easily.
- Make sure the platform works well on phones, tablets, and computers.

Limitations:

- Basic security; no advanced fraud protection.
- Limited digital marketing features.
- May face performance issues under high traffic without upgrades.

Approved
